In the name of God, the Merciful, the Compassionate

Praise be to God and peace upon his servants whom He has chosen.

Specify the travel duration

Brother Sayf al-'Adl, May God protect him.

Peace and the grace of God and His blessings be upon you.

We ask about your health and well being and we ask God Almighty to keep you in the best of conditions.

1. As for arranging the transportation of the brothers to and from the front line, whether from Tawhid, Bahar or Taysir, we need to know the number of brothers, how long they are staying, and the direction they will be heading afterwards, as this is our responsibility. It is an organizational matter, which a brother must not determine on his own, but it must be determined by the people who sent him; however, if there is a change in the plans later on, the sending party must be notified of that.

As many brothers agree, one person must be responsible for preparing and organizing the matters of those young men; particularly those who pledged their loyalty to us and we see it as very important. Every brother must have a file where all of his information is recorded, such as: His date of birth, training he has taken, place of the training, the level and the opinion of those who trained him, the frontline/battles he served in, and the opinions of his Emirs. And other information such as the injuries he has suffered, his physical condition, and his overall condition etc. --

Request of a brother to arrange time of entry

And other information that the person in charge must know when he nominates any brother for any kind of job. Such information is memorized by the brothers but not gathered and will eventually be impacted by the attitudes of the brothers in charge and their psychological state when they are asked about this brother or that brother.

I believe there are many benefits in this, and it has no disadvantages. It is, as you can see, one of the simple matters where a brother with medium level capabilities can record, arrange and document the information in a classified file that can be accessed if necessary.

Please give this matter your attention because this youth program has become very worrisome to them personally, particularly because they are kept in the dark. That affects their productivity and efforts as well as their psychological state. Having a suitable brother in charge will lift the burden off the shoulders of others in charge as well, since he would be able to monitor the designated programs in general such as work progress and the brothers' movement from one place to another per the instructions given by the person in charge.

May God reward you with good deeds, and remember us in your prayers.

11/16/98

Your brother,

'Abd-al-Hadi al-'Ansari

27 Rajab 1419 H [TC: Hijri date corresponding to 16 or 17 November 1998]

Note: All Iraqi brothers are going to Pakistan to renew their United Nations' cards. Please take care of their needs, and make sure they do not mingle with the rest.

Thank you
